

What You'll Learn in AI and ML

- **Machine Learning** -Supervised Learning, Unsupervised Learning, Neural Networks, Model Evaluation
- **Deep Learning**- Neural Networks, Computer Vision, Natural Language Processing, Reinforcement Learning
- **AI Applications**- Image Recognition, Speech Processing, Predictive Analytics, AI Ethics

Admin Curated Learning for AI and ML

Intro to Machine Learning: Level- Intermediate, Duration- 3 hours, It Cover supervised learning, model evaluation, and practical examples.

##AI and ML Learning Resources –

Documentation & Guides

- **TensorFlow Documentation**- Official documentation for TensorFlow, covering everything from basic concepts to advanced deep learning techniques.
- **PyTorch Tutorials**- Comprehensive tutorials for PyTorch, including neural networks, computer vision, and natural language processing.
- **Scikit-learn Guide**- Detailed guide for machine learning with scikit-learn, including data preprocessing, model selection, and evaluation.

Practice Projects

- **Image Classification**- Build a CNN model to classify images using TensorFlow or PyTorch. Learn about data augmentation and transfer learning.
- **Sentiment Analysis**- Create an NLP model to analyze text sentiment. Practice text preprocessing and model training with real-world data.
- **Time Series Prediction**- Develop a model to predict future values in time series data. Learn about LSTM networks and sequence modeling.

Community & Support

- **Kaggle**- Join competitions, share code, and learn from other data scientists. Access datasets and notebooks for practice.
- **AI Stack Exchange**- Get help with AI and ML questions. Connect with experts and find solutions to common problems.
- **AI Community**- Join discussions about AI research and applications. Stay updated with the latest developments in the field.

AI & ML Videos

1. **Machine Learning**- [ML Fundamentals](#), [Neural Networks](#), [Feature Engineering](#)
2. **Deep Learning**- [CNN Basics](#), [RNN and LSTM](#), [Transfer Learning](#)
3. **AI Applications** -[NLP Projects](#), [Computer Vision](#), [Reinforcement Learning](#)

AI & ML Quiz-Duration- **30 Minutes**, Total Questions- **20 Questions**, Passing Score- **70%**
